

DHEENADAYALAN N

📍 Bengaluru, Karnataka, India ✉ dheenadayalandgl@gmail.com ☎ 6379618492 🌐 [in/dheenadayalan-cse](https://in.linkedin.com/in/dheenadayalan-cse)

SUMMARY

Computer Science undergraduate with a focus on Software Development, Data Analytics, and AI. Built real-world systems including an AI-based business query bot, machine learning-based fraud detection system, and IoT-based smart monitoring solution. Strong foundation in backend development, data processing, and scalable system design.

EXPERIENCE

Intern

Larsen & Toubro (L&T)

April 2026 – May 2026, Chennai, Tamil Nadu, India

- Developed ML-based **fraud detection** and an **IoT smart dam monitoring system** with predictive models (XGBoost/LSTM) and real-time dashboards, enabling data-driven decision-making

Data Analytics Intern

Rapsol Technologies Pvt. Ltd.

April 2025–May 2025, Bengaluru, Karnataka, India

- Engineered scalable Oracle SQL systems (50M+ records) with optimized queries and Power BI dashboards, ensuring high data integrity and accelerating data-driven decisions

PROJECT

KPN AI Bot – Business Query & Reporting System

Personal / Client Project (Emilda & Co.) • github.com/DHEENADAYALAN-1/kpn-ai-bot • April 2026 – April 2026

- Built an AI-based business query system using Node.js and Supabase to fetch real-time insights (revenue, expenses, parcel status)
- Designed backend APIs and query-mapping logic to convert user questions into structured database queries
- Implemented Excel report generation (ExcelJS) and an interactive dashboard UI for quick insights
- Integrated phone-based access control and deployed using Docker for scalable execution

Fraud Detection System – Machine Learning Based

Larsen & Toubro (L&T) • github.com/DHEENADAYALAN-1/fintech-fraud-detection • April 2026 – May 2026

- Developed a machine learning-based fraud detection system to identify anomalous financial transactions
- Performed data preprocessing, feature engineering, and exploratory data analysis on structured datasets
- Implemented classification models and optimized performance to improve detection accuracy and reduce false positives
- Built an interactive dashboard using Streamlit for real-time prediction, alerts, and data visualization

Smart Dam Water Level & Safety Monitoring System

Larsen & Toubro (L&T) • github.com/DHEENADAYALAN-1/2.Smart-Dam-Water-Level-Safety-Monitoring-L-T

- IoT-AI System: Engineered an end-to-end monitoring system using ESP32 and IoT sensors for real-time cloud-integrated dam safety tracking.
- Predictive Modeling: Developed a hybrid ensemble (LightGBM, XGBoost, LSTM) achieving an RMSE of 0.237 for risk classification and proactive management.
- Data Visualization: Built Power BI dashboards to visualize flood trends and risk levels (Low/High), supporting critical operational decision-making.

Vetting Zoo – AI-Based Smart Resume Screening System

Self-Initiated • github.com/DHEENADAYALAN-1/Vetting-Zoo

- Vetting Zoo: Developed an AI resume screener using NLP (SpaCy, Rezi.ai) and PDF/DOCX parsing for structured data extraction.
- Algorithm Design: Implemented scoring algorithms achieving 85% accuracy across 50+ resumes, reducing manual effort by 60%.
- Deployment: Delivered a Streamlit app for Habitat for Humanity, aligning AI logic with hiring standards.

AI-Powered Smart Resume Screener

Self-Project • github.com/DHEENADAYALAN-1/Smart-Resume-Screener

- Smart Resume Screener: Developed a Flutter and Gemini 3.5 Flash app with Supabase for secure data persistence.
- Semantic AI: Engineered scoring algorithms for quantitative match scores and skill-gap analysis.
- Optimization: Leveraged OpenRouter API and custom middleware, achieving a 98% success rate in diverse resume format text-extraction.

EDUCATION

B.Tech Computer Science and Engineering

CHRIST UNIVERSITY • Bangalore • 2027

CERTIFICATIONS

AWS Academy Graduate – AWS Academy Cloud Foundations

AWS Academy • 2025

AWS Academy Graduate – Data Engineering Training

AWS Academy • 2025

Operating System

Scaler • 2025

COURSEWORK

Professional Certification Program in Computer Science Engineering

Intellipaat (in collaboration with IIT Roorkee) • 2026 • Software Development, System Design, Data Analysis, Machine Learning

- Developed practical projects using Python and other tools, gaining experience in backend logic, data processing, and designing scalable, real-world applications.
 - Applied machine learning and data analytics concepts to complete hands-on projects, including predictive modeling, data visualization, and problem-solving tasks.
-

SKILLS

Cloud & DevOps: AWS Infrastructure, Cloud Security, AWS Academy (Cloud Foundations & Data Engineering), Docker (Containerization), Git, GitHub, VS Code

Databases & Analytics: SQL, Oracle SQL Developer, Supabase (PostgreSQL), Relational Databases, Data Analysis, Data Cleaning, Query Optimization, Analytical Reporting

AI & Machine Learning: XGBoost, LightGBM, Anomaly Detection (Fraud Systems), Feature Engineering, Model Evaluation, Predictive Modeling (IoT Risk Analysis), OpenRouter API

Backend & APIs: Node.js, REST APIs, API Design & Integration, Query-to-Database Mapping Systems, Supabase Auth

Data Visualization: Power BI, KPI Dashboards, Streamlit (Web App Development), Business Insights Dashboards

Frontend: HTML, CSS, JavaScript, React, Next.js, Flutter (Dart)

IoT & Systems: ESP32, Sensor Integration, Real-Time Data Systems, Smart Monitoring Systems

Programming Languages: Python, Java, C, Dart, JavaScript

Soft Skills: Analytical Thinking, System Design Mindset, Problem Solving, Team Collaboration, Communication
