SUMMARY

Computer Science undergraduate with a strong interest in enterprise systems, cloud technologies, and business process automation. I enjoy designing structured, repeatable solutions that automate workflows and improve operational efficiency. Built **NeedARoomie**, a data-driven platform to solve a real problem in my university where students struggled to find compatible roommates. The platform automates the end-to-end process—from profile creation and matching to communication and notifications—using backend logic, database triggers, and AI-driven workflows. Passionate about combining technology and business to build scalable systems that enable structured growth.

EXPERIENCE

Web Development Intern

ApexPlanet Software Pvt. Ltd.

April 2025 – May 2025, Bihar

- Completed **10+ structured web development tasks** as part of a guided remote internship program.
- Developed and enhanced **5+ responsive web pages** using HTML, CSS, and JavaScript.
- Implemented **client-side features** including forms, validations, and reusable UI components based on provided specifications.
- Debugged and improved frontend logic across **multiple task modules** to ensure functional correctness and usability.
- Followed defined workflows, deadlines, and submission standards in a **100% remote setup**, strengthening disciplined execution.

PROJECTS

NeedARoomie – Automated Roommate & Rental Matching Platform

Self-Initiated University Project • needaroomie.com/ • July 2025 – Present

- Developed a full-stack web platform supporting **multiple cities and organizations** for verified room and roommate discovery.
- Architected **8+ structured workflows** covering room listing, roommate profile creation, verification, and approval processes.
- Automated **100% of room and roommate verification approvals** using backend logic and database triggers.
- Implemented **event-driven email notifications** for **5+ user actions**, streamlining onboarding and communication.
- Designed organization- and lifestyle-based matching logic using **multiple compatibility parameters** to improve transparency.
- Applied **role-based access control (RBAC)** across **multiple user roles** to support secure and scalable operations.

EDUCATION

B.Tech Computer Science and Engineering

CHRIST UNIVERSITY • Bangalore • 2027

CERTIFICATIONS

Ultimate AWS Certified Solutions Architect Associate 2026

Udemy(Stephane Maarek) • 2026

- Builds strong understanding of AWS core services (EC2, S3, IAM, VPC, RDS)
- Teaches design of scalable, highly available, and fault-tolerant architectures
- Covers AWS security best practices and access control using IAM
- Provides hands-on experience with infrastructure automation using CloudFormation
- Explains monitoring, logging, and cost optimisation using CloudWatch
- Aligns with real-world cloud architecture scenarios and AWS Solutions Architect Associate standards

Complete Linux Training Course

Imran Afzal (Udemy) • 2025

- Hands-on experience with Linux system administration and command-line operations
- Knowledge of shell scripting for basic automation tasks
- Understanding of networking, services, and system updates
- Exposure to disk management, run levels, and process control
- Relevant for backend systems, cloud environments, and enterprise application support

Meta Front-End Developer Professional Certificate

Meta • 2024

- Provides strong foundation in web application development, component-based architecture, and building user-facing systems. Supports enterprise application development and understanding of scalable front-end solutions used in business platforms.

SKILLS

- Databases:** SQL, PostgreSQL, database triggers, AWS RDS
 - Enterprise Systems:** ERP fundamentals, business workflows, system integration
 - Cloud:** AWS (EC2, S3, IAM, VPC, RDS, CloudWatch, CloudFormation, high availability & security basics)
 - Back End:** Node.js, REST APIs, cloud-integrated backend services
 - Front End:** HTML, CSS, JavaScript, React, Next.js
 - Automation & DevOps:** GitHub Actions, CI/CD basics, infrastructure automation (CloudFormation)
 - Monitoring & Communication:** Sentry (error monitoring), Brevo (email automation), AWS CloudWatch
 - Testing:** Unit testing, functional testing
 - Tools:** Git, GitHub
 - Documentation:** Technical & cloud architecture documentation
 - Soft Skills:** Analytical thinking, system design mindset, team collaboration, communication
-
